HORIZON S Pro 4K ULTRA HD

## Pro Innovation, 4K Immersion

Dual Light 2.0 Technology

Dual Light 2.0 technology is XGIMI's latest achievement in applying a "Wide Spectrum + Narrow Spectrum" hybrid light source technology. By combining both light sources, this technology creates a continuous natural spectrum, unleashing the full potential of both sources for exceptional picture quality in brightness, contrast ratio, color gamut, and color accuracy.
Dolby Vision Certified

Dolby Vision brightens highlights up to 40 times more and enhances darks up to 10 times more than standard picture quality. Anything you watch will truly come alive!
1800 ISO Lumens

1800 ISO Lumens, not limited by time or space, ensures that the big screen stays clear and bright.

Built-in Flexible Stand

Easily control the gimbal with one hand, ensuring optimal viewing angles from any position. The projector supports adjustments of 360° horizontally and 135° vertically, so you can project onto walls, ceilings, and other surfaces for a customized large-screen experience.

ISA 5.0

Making smarter and more user-friendly projectors has always been XGIMI's vision. With the brand new ISA 5.0 tech, XGIMI elevates adaptability, environment awareness, and calibration accuracy to new heights while ensuring top-notch image quality.

Remark:
1. The brightness data is from the XGIMI Laboratory. Actual product brightness may differ based on the specific test software version, testing environment, and product version.
2. All parameters listed on this page are measured in a controlled test environment before the product is mass-produced. The results may vary based on individual user experiences, including different environments, usage conditions, and firmware versions.
